

# COURSE OUTLINE

**Course Name:** Copilot Foundations

**Course Code:** MS-AI3018

**DELIVERY**

1 Days

**SKILL LEVEL**

Intermediate

**DELIVERY METHOD**

In Class/VILT

**TRAINING CREDITS**

N/A

**TECHNOLOGY**

Azure AI

## Course Overview

Copilots are quickly becoming a popular way to use with AI models, automate tasks, and improve productivity. In this learning path, you'll explore options for adopting, using, and creating copilots.

## Prerequisites

Familiarity with Azure and the Azure portal.

## Course Content

### Module 1: Fundamentals of Generative AI

In this module, you explore the way in which language models enable AI applications and services to generate original content based on natural language input. You also learn how generative AI enables the creation of copilots that can assist humans in creative tasks.

#### Lessons

- Introduction.
- What is generative AI?

- What are language models?
- Using language models.
- What are copilots?
- Microsoft Copilot.
- Considerations for Copilot prompts.
- Extending and developing copilots.
- Exercise - Explore Microsoft Copilot
- . - Knowledge check.
- Summary.

## **Module 2: Get started with Microsoft Copilot Studio**

Microsoft Copilot Studio allows organizations to quickly create copilots based on business scenarios their customers and employees can easily interact with as needed. In this module, you're introduced to key concepts for copilots.

### **Lessons**

- Introduction.
  - Get started working with environments.
  - Create copilots and work with the Microsoft Copilot Studio interface.
  - Enhancing productivity with Generative AI.
  - Create topics.
  - Test bots.
  - Publish bots and analyze performance.
-

- Exercise - Microsoft Copilot Studio.
- Check your knowledge.
- Summary.

### **Module 3: Introduction to Azure AI Studio**

Microsoft Azure offers multiple services that enable developers to build amazing AI-powered solutions. Azure AI Studio brings these services together in a single unified experience for AI development on the Azure cloud platform.

#### **Lessons**

- Introduction.
- What is Azure AI Studio?
- How does Azure AI Studio work.
- When to use Azure AI Studio.
- Exercise - Explore Azure AI Studio.
- Knowledge check.
- Summary.

### **Module 4: Get started with Microsoft Copilot Studio**

Microsoft Copilot Studio allows organizations to quickly create copilots based on business scenarios their customers and employees can easily interact with as needed. In this module, you're introduced to key concepts for copilots.

#### **Lessons**

- Introduction.
  - Get started working with environments.
-

- Create copilots and work with the Microsoft Copilot Studio interface.
- Enhancing productivity with Generative AI.
- Create topics.
- Test bots.
- Publish bots and analyze performance.
- Exercise - Microsoft Copilot Studio.
- Check your knowledge. – Summary.

#### **ASSOCIATED CERTIFICATIONS AND EXAM**

There is no Associated certification or exam for this course.
